Dear Faculties,

This is my humble request to motivate your student towards the research area in their respective interest. In India research institute already has lack to attract bright and hardworking students from reputed institute. I am having frequent trainee student from DAU Indore since 2017 and I found those student not only very sincere and hardworking but also having good research attitude. All these students were performing very well here and publishing paper in IEEE main conference. Even after such hard work these students are not getting good marks at DAU as motivation factor. Recently, student from your institute at CSIR-CEERI performed very well even in such pandemic situation and submitted three conference paper in which one paper selected in TENCON 2020 which IEEE Region 10 main conference and two more paper result awaited and I hope those will be selected too. After such hard work even student gets only 8.0 grade which is very normal in most of the universities. This is my request to recognize your student for their hard work in form of giving good grade above 8.5 if they are doing well enough compare to others.

Dear Dr Saini

Many thanks for your mail and in fact, I am so happy reading content of your mail. I feel moved by your appreciation of our students who are doing work with you and bringing good name for our department.

Let me assure you that we have a very transparent system of evaluation and probably you are aware that we do give heavy weightage to supervisor's feedback in finalizing grades. We shall certainly address the concerns that you have raised.

Many thanks for writing to us.
