

## School of Energy & Environmental Studies

### 2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learners

#### Response:

The assessment of the learning levels of the students is done by the teachers in the classrooms during lectures and through conducting class tests, assignments, tutorials, etc; on the basis of which slow and advanced learners are identified

#### Slow Learners:

- Tutorials and remedial classes are organized, the purpose of which is to give special attention in areas where they need support.
- Additional reading material and books in simple form is made available to increase their understanding of the subject. E-links are also suggested to the students to help them gain an in-depth knowledge of the subject.
- Bilingual explanations and discussions are done in the class with the aim of reaching out to the slow learners so that they can be brought at par with the rest of the class.
- Personal, academic and career-related counselling is given from time to time by faculty members and seniors.

**Advanced Learners:** During lectures, tutorials, class tests, assignments and interaction outside the class, the teachers are able to assess the calibre of the students and identify the advanced learners. They are encouraged to help and provide support to the weaker students by engaging in group discussions and presentations.
