**OBJECTIVE:**

1. To make students aware and help they understood about good construction practices. 2. To help students make better choices in civil techniques and materials. 3. To make them understand about the market value of product. 4. Give them direction to built strong structure by using good and budget friendly products.

The webinar started with introduction of Er. Prakash Khudche by the students of the department of lifelong learning. Head of department Dr. Bharti Joshi warmly welcomed our honorable speaker. Mrs. Ashwini Godkhe gave summarized information regarding the webinar. Er. Prakash khudche took over the command and start telling about their products and its manufacturing and some of their major projects and so on.

So going with the flow he started us explaining about their firm as well as the usage of the products thry basically deal with.

Students got some knowledge of concrete, iron rods, plinth, windows, slabs etc he asked students to adopt some good construction practices that the mentioned in this webinar.

Our speaker also gave information regarding the elitcrete, megacrete, xpresscete, previouscrete, easy Crete and dycrete. He also mentioned their uses in the webinar.

Then we move forward and he starting giving knowledge regarding the costing of the above mentioned the products. Also we saw some of the pictures of their local siites as well as the shared the difficulties they faced during the site and later shared the solution they made.

At last our dearest students thanked Er. Prakash Khudche for his precious time and knowledge he provided them.

Mrs. Ashwini Godkhe also thanked the speaker for making this webinar possible with his time and knowledge.
