DATE	TIME	Venue	NO.OF PARTICIPANTS	Convener
29 September	12:00 to4:30	Health centre,	09	Ms. Sneha Kasera,
2022		Davv		Visiting Faculty

On the Auspicious occasion of World Heart Day, Indore Social Welfare Society, DAVV University and Health Center, Indore, Organized a Blood Donation Camp in Takshila Campus Khandwa Rd, Indore MP on 29 Sept 2022.

Students donate blood not for the name but to help any unknown person, selflessly. There is only one charity where neither money nor religion nor caste Matters, only humanity Matters. If you look at the figures for Indore, then there is a population of 45 lakhs, but even 1% of its population does not donate blood. And why is it asked again and again to donate blood?

This question will definitely come to the mind of all of you that there were camps just now, why is it needed again? The answer is that every 3 seconds some unknown person needs blood, more than 10 lakh people come out every year suffering from blood cancer, emergency case, accident case, delivery case and especially those children who have Thalassemia blood disorder. , which can survive for a maximum of 15 days without blood transfusion. By donating blood once every three months, you can save the life of others and also protect your own health. After donating blood, you get five types of tests like HIV, Vidal, Malaria, Hepatitis-A, B, C, D, E and NET test. Only after all these tests does your blood reach the needy safely.

We are educated youth and also aware. If we are healthy then we must help those people who are struggling with life every day.

In order to raise awareness about this life-saving procedure, the world observes 29th September as World Heart Day. It promotes blood donation and urges people to save lives by donating blood. Furthermore, this day is quite an important day as it makes people about safe blood. People need to know the basics to be able to donate blood. For instance, there are certain criteria one must fulfill to donate blood. Not everyone knows that. Thus, this day helps in doing so. A person eligible to donate blood must fall in the age bracket of 18-66 years of age. They must weigh more than 50 kgs and have sound health. People suffering from diseases like diabetes, hypertension and more cannot donate blood. So, Before Donating Blood All the students participated in Blood donation Camp went through these Tests and then was declared eligible for Blood Donation. Every Department in DAVV participated in Blood Donation Camps. If I talk about Department of lifelong learning Total 8 Students participated in this Program Under the guidance of Visiting Faculty of that department Ms. Sneha Kasera. Along with Students Ms. Sneha Kasera also Donated Blood. Similarly, many other departments participated
