

## **Devi Ahilya Vishwavidyalaya**

Many laws, rules and regulations were made by Government of India to achieve the environmental sustainability through holistic approach. DAVV regulates all clean and green practices. In the era of climate change and resource depletion it is necessary to verify the processes and convert it in to green and clean one. University has maintained Green and Clean Campus by following green initiatives mentioned in green calendar and green policy under the leadership of Energy and Environmental task group. Plantation drive performed each year under “Hariyali Mahotsav”.

### **Features of the Green Policy:**

- The policy would help to empower the university to frame a better environmental performance.
- Waste segregated dustbins were placed in all prominent places and regular cleanliness drive organized to clean specific sites.
- Tree plantation drive organizes to save our eco system
- Recognize energy conservation by the use of LED lights
- Motivate staffs and students for optimized and sustainable use of resources like Switching off electrical appliances when not in use and use of day lighting
- Plastic-free campus is a much-anticipated move to reduce the environmental burden and make a contribution to the 'Swachh Bharat' mission.
- Pedestrian friendly pathways
