## IIPS, DAVV

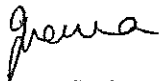

### Proposal for Departmental Committee

Sub:- Approval of new specialization schemes for MBA(MS) 5yrs PG and MBA(MS) 2yrs

A workshop was conducted at IIPS in June 2015 to review the course structure, curriculum and course content of various programs. Opinion was gathered from industry experts, subject experts, faculty, alumni and students. The outcome of this workshop is to offer the new scheme of specialization from July 2015.

- The scheme of Dual specialization and Single specialization is proposed to be offered to students in Marketing, Finance and HR
- The credits in each semester are proposed to be in accordance with new Ordinance 31.
- This being the introductory year for this new scheme, it is possible that less number of students opt for any particular option. Therefore, it is proposed that the present scheme will be offered even if there are minimum 5 students in a group.
- The proposed scheme has been approved by the expert panel.
- The proposed scheme has also been approved by Program Incharges of all programs of IIPS.
- The Schemes approved by Expert Panel and Minutes of PI Meeting are enclosed

Submitted for approval.

Program Incharge  
MBA(MS) 5yrs PG

Program Incharge  
MBA(MS) 2yrs

# International Institute of Professional Studies

## MBA(MS) 2yrs

### Scheme Proposed From July'15 onwards

As per the revisions proposed in the course review workshop at IIPS, the structure of MBA(MS) program needs to be reviewed keeping in mind the following objectives :-

- Enrich the course in terms of quality
- Reduce the number of hours spent for theoretical teaching so that practical exposure can be added by the students.
- Increase academic flexibility.

#### Changes Proposed

- Break up of credits Present and Proposed (Over Two Years)

| S.No | Type of subject /Area                       | Number of subjects |           | Credits per subject |          | Total Credits |            |
|------|---|--------------------|-----------|---------------------|----------|---------------|------------|
|      |   | Present            | Proposed  | Present             | Proposed | Present       | Proposed   |

Electives and specialization scheme to be offered from July 2015

#### ➤ Sem I and II - Proposed Scheme

The students joining MBA(MS) program are primarily from two backgrounds- Technical and Non Technical in terms of their graduation. The students from technical background are well versed with basics of IT and CS. Whereas, the students from Non Technical background are well versed with basics of accounting. Therefore, it is proposed that an elective option may be added from the first semester itself. This will increase the academic flexibility

| Subjects offered           | Choice                    | Credits |
|----------------------------|---------------------------|---------|
| Core 1                     | Compulsory                | 4       |
| Core 2                     | Compulsory                | 4       |
| Core 3                     | Compulsory                | 4       |
| Core 4                     | Compulsory                | 4       |
| Core 5                     | Compulsory                | 4       |
| Core 6                     | Compulsory                | 4       |
| Elective 1                 | Select Any one            | 4       |
| Elective 2                 |                           | 4       |
| Seminar / Industrial Visit | Compulsory                | 2       |
| <b>Total Subjects -7,</b>  | <b>Total Credits - 30</b> |         |

➤ Sem III and IV -Proposed Scheme

In order to increase academic flexibility, without reducing the richness and quality of course, following structure is proposed. The student can select as per following scheme

| Core / Elective / Specialisation                   | Semester III & IV sem <sup>Single</sup> <del>Super</del> Specialisation      |         |          |         |
|--|--|---------|----------|---------|
|  | (Group A is for Dual specialization and Group B is for Super Specialisation) |         |          |         |
|  | Code   | Subject | Code     | Subject |
| Core (Compulsory)                                  | 1) Subject 1, 2) MRP /DMS (Only in III Sem)                                  |         |          |         |
| Elective Marketing                                 | GROUP MA   |         | GROUP MB |         |
|  |  | MA-1    |          | MA-4    |
|  |  | MA-2    |          | MA-5    |
|  |  | MA-3    |          | MA-6    |
| Elective Finance                                   | GROUP FA   |         | GROUP FB |         |
|  |  | FA-1    |          | FA-4    |
|  |  | FA-2    |          | FA-5    |
|  |  | FA-3    |          | FA-6    |
| Elective HR  | GROUP HA   |         | GROUP HB |         |
|  |  | HA-1    |          | HA-4    |
|  |  | HA-2    |          | HA-5    |
|  |  | HA-3    |          | HA-6    |
| Total Subjects – 7 + 1 MRP / DMS, Total Credits 30 |  |         |          |         |

The student will have the following options :-

|                            |           |           |           |
|----------------------------|-----------|-----------|-----------|
| 1) Dual Specialisation –   | a) MA+FA  | b) MA +HA | c) FA +HA |
| 2) Single Specialisation – | a) MA +MB | b) FA +FB | c) HA+HB  |

- One core subjects will be offered it will be compulsory
- Three specialization area will be offered – Marketing, Finance and HR
- The student will have to choose any one –
  - A Dual Specialisation - The student will choose any set of electives from Group A. Group B will NOT be available as a choice.
  - A Super Specialisation – The student will choose any one set of electives from Group A and second set of electives from Group B of SAME specialization.
- The choice of “Dual specialization” or “Super Specialisation” will be chosen by the student at the beginning of third semester and will remain same in fourth semester. It will not be changed under any circumstances.

### Advantages of New Scheme

- Almost Same Number of Total Subjects being offered (Present scheme -20 , Proposed Scheme -19)
- More academic flexibility to students (Present scheme – Major and Minor, Proposed scheme – Dual or Super, Present – 3 combinations, Proposed – 6 combinations)
- Reduced Credits (Present 148, proposed 132) – More time for out of class activities
- Reduced number of classroom hours each day ( Time tables can be squeezed in short time due to NON overlap of specializations)
- Same Class room resources are utilized (three rooms – but for lesser hours)
- Electives in Sem I and II also
- More Electives (Present 32 / 56, proposed 28 /54)
- Seminar / Field Visit / Industrial Training will improve the learning

## Subjects to be Offered from July 2015

| Core / Elective  | Semester I |  | Semester II |  |
|--|------------|--|-------------|--|

## Minutes – Scheme & Course Revision 2015

In one week workshop conducted on “syllabus and scheme revision” MBA (APR) program scheme and syllabus review was done at IIPS, DAVV:

Following are the highlights of the meeting:

1. Scheme of the APR program is revised.
2. Number of subjects are made to seven (7) from eight (8) in each semester, keeping in mind ordinance and industry requirements.
  - 2.1 To bring the above change in program scheme, rural and retail marketing are clubbed, and AFM I and AFM II are also clubbed.
  - 2.2 Sales promotion is clubbed into with Integrated Marketing Communication and on the same lines management of Ad Agency is clubbed with Advertising Management.
  - 2.3 CRM and entrepreneurship are dropped from course, as per experts suggestion.
3. A new subject “Seminar/ Internship presentations” is introduced in every semester. The subject is of Two (2) credits.
4. Major Research Project subject is made an elective subject with Decision Making Skills.
5. Scheme and content are attached.

Following experts attended the meeting –

1. Mr. Atul Bhatia
2. Mr. Amit Sakunia
3. Ms. Rahul Pandey
4. Dr. Jyoti Sharma
5. Dr. Manish Sitlani
6. Dr. Geeta Nema
7. Dr. Geeta Sharma
8. Dr. Suresh Patidar
9. Dr. Pooja Jain
10. Dr. Anshu Bhati
11. Dr. Surendra Malviya

Meeting of all program – incharges and invited subject experts was held on 25.07.18 & 26.7.18 at 11 AM. Following decisions related to Subject scheme of MBA (Entrepreneurship) 2 Years course were taken. These changes are to be implemented in 2017 and 2018 batch.

**For 2018 Batch -**

1. The number of subjects reduced from 8 to 7 subjects
2. The credits of subjects of I semester increased from 3 to 4.
3. 4 subjects of 2 credits are introduced.
4. Total Credits for each semester will be -
  - 6 subjects \* 4 valid credits = 24
  - 1 subject \* 2 valid credits = 2
  - Comprehensive viva voce = 4 virtual credits
  - Total Credits per semester = 30
5. The syllabus of introduced subjects of I semester.
  1. Principles and Practices of Management and
  2. Entrepreneurial Decision making was also prepared

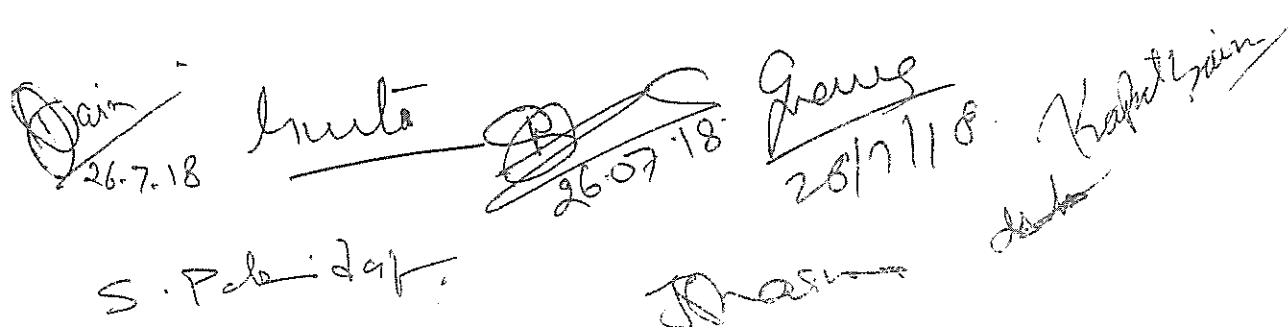

(Detailed scheme and syllabus is attached)

**For the running 2017 batch –**

1. It is decided to retain the old approved scheme
2. It was decided that the scheme of marks for following subjects will be 40 marks – Internal assessment and 60 marks – external assessment.
  - i) Writing Business Plan (III SEM)
  - ii) Business Start –up Practicum /Incubation (IV SEM)

Syllabus of both the subjects is also prepared.

(Old Detailed scheme and syllabus is attached)

## Order

A two day workshop on syllabus of newly introduced subjects of M.Tech(IT) and MCA programs , is scheduled on 5<sup>th</sup> and 6<sup>th</sup> January 2018.

Ms. Manju Suchdeo and Dr. Shaligram Prajapat will be coordinator of the workshop.

A. Sapre  
Director

Date:4<sup>th</sup> January 2018

### Order

A two day workshop on syllabus of newly introduced subjects of M.Tech(IT) and MCA programs, is scheduled on 5<sup>th</sup> and 6<sup>th</sup> January 2018. Following members are nominated for the workshop.

#### External Experts

1. Dr. Vindra Tokekar .
2. Dr. Sanjay Tanwani.
3. Dr. Maya Ingle.
4. Dr. Suresh Jain.
5. Dr. Meena Sharma.
6. Dr. Manish Sitlani.
7. Dr. Preeti Saxena.
8. Dr. Vaibav Jain.

#### Internal members

1. Dr. Kirti Mathur.
2. Dr. Ramesh Thakur.
3. Dr. Shaligram Prajapat.
4. Mr. Jugendra Dongre
5. Ms. Manju Suchdeo.
6. Dr. Yasmin Shaikh.
7. Dr. Rahul Singhai
8. Ms. Poonam Mangwani
9. Mr. Rajesh Verma
10. Mr. Basant Namdeo
11. Ms. Shraddha Soni
12. Mr. Nitin Nagar
13. Ms. Kirti Vijayvergiya
14. Mr. Rupesh Sendre

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
M. Tech. (5 ½ Years) VI Semester

IT-814: Advanced Computer Architecture

**Aim of Course:** To understand the concepts of design and analysis of the hardware of a Parallel pipeline and distributed computing system and its components such as processing element, memory.

**Objectives:**

The course is designed to make students:

- Learn concept of parallel processing.
- Understand various model of parallel computing
- Understand the concept of pipelining

**Course Contents:**

**Unit I**

Introduction to Parallel Processing, Parallelism in Uniprocessor system, Parallel Processing mechanism, Parallel Computer Structure, Flynn's Classification, Handler's Classification, Structural Classification, Classification Based on Grain Size, Bernstein Conditions for Detection of Parallelism, Parallel Processing Applications.

**Unit II**

Levels of Parallel Processing, Pipeline design, Synchronous & Asynchronous Pipeline conflicts: Resource conflict, Data dependency, and Branch difficulties. Solutions to deal with pipelining: Hardware interlocks, Operand forwarding, Delayed load, Pre fetch target instruction, Branch target buffer, Loop buffer, Branch prediction, and Delayed branch.

**Unit III**

Classification of Pipeline Processor, Super scalar design: Super pipelining, and VIW processors, Reservation table, Interleaved memory organization, Principals of designing of Pipeline Processor, Vector Processing requirements.

**Unit IV**

SIMD Array Processor, SIMD interconnection Networks, Parallel Algorithm for Array Processors, Matrix Multiplication, sorting, Parallel Software issues.

**Unit V**

Multiprocessor Architectures, loosely and tightly coupled multiprocessors, Parallel algorithms for multiprocessors, classification of parallel algorithm, performance of parallel algorithms, Operating systems for multiprocessors systems, Muticore architectures, Introduction to GPU architecture, latest trends.

**Reference Books:**

1. Computer Architecture and Parallel Processing Kai Hwang and Faye A. Briggs, McGraw-Hill.
2. Computer Architecture and Organisation John P. Hays, McGraw-Hill

*changed as per suggestions of external*

Wireless and Mobile Computing *communications*

**Objective:**

To learn and understand basic concepts of cellular system, wireless propagation and the techniques used to maximize the capacity of cellular network.

To learn and understand architecture of GSM and CDMA system. To understand mobile management, voice signal processing and coding in GSM and CDMA system.

To understand mobile devices connectivity to Internet.

**Prerequisites:** Computer Networks

**Unit I**

Introduction: Overview of the emerging field of mobile computing; Historical perspectives (mainly from the perspective of radio). Land mobile vs. Satellite vs. In-building communications systems, RF vs. IR. Characteristic of Cellular Systems. Mobility support in cellular telephone networks. Mobile applications. Limitations. Health Concerns.

**Unit II**

Mobile communication: Fiber or wire based transmission, Wireless Transmission: Frequencies, Antennas and Signal Propagation path loss of radio signals, Additional signal propagation effect, Multipath propagation, Spread Spectrum- DSSS and FHSS.

Modulation Techniques, Multiplexing techniques, Coding techniques, CDMA, Multiple Radio Access Introduction Contention based protocols, Channel Allocation

**Unit III**

The Cellular Concept : Introduction, Cell Area, signal strength and cell parameters, capacity of a cell, Frequency reuse, Co-channel Interference, Cell splitting, Cell Sectoring.

Mobile Communication System : Introduction, Cellular System Infrastructure, Registration, Handoff support, Multicasting, Authentication & security, frequency hopping.

Introduction Contention based protocols, Channel Allocation.

GSM: System architecture of GSM, protocols, localization and calling, handover, security.

**Unit IV**

IEEE802.11: Protocol architecture, layers, Information bases and networking.

Case Study on Wireless LAN infrastructure and Bluetooth.

Mobile IP, goals, assumptions requirements, entities & terminology, IP packet delivery, tunnelling and encapsulation, Feature & format IPv6, DHCP, TCP over Wireless.

**Unit V**

Characteristic of Ad Hoc networks, Applications, need for routing, routing classification, Wireless sensor networks, classification & Fundamental of MAC protocol for wireless sensor networks, Introduction to IOT

**Text Books:-**

1. Mobile Communications author Jochen Schiller, publication John Willy & Sons, Ltd.

2. Wireless And Mobile Systems author D P Agrawal & Qing-An zeng, publication Thomson.

**Reference Books:-**

1. Wireless Networks author P Nicopodidis, publication Addison Wesley-An zeng publication

2. Mobile Computing author Dr. Rajkamal, publication Oxford University Press.

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
M. Tech. (IT) 5 ½ Years IX SEMESTER  
Elective IT-903 Embedded Systems

**COURSE OBJECTIVES**

- To provide a clear understanding on the basic concepts, Building Blocks of Embedded Systems
- To teach the fundamentals of Embedded processor Modeling , Bus Communication inprocessors, Input/output interfacing.
- To introduce on processor scheduling algorithms , Basics of Real time operating system.
- To expose the students to the fundamentals of embedded Programming.
- To study basic concepts of embedded C , Embedded OS
- To Introduce the GNU C Programming Tool Chain in Linux.

**UNIT I INTRODUCTION TO EMBEDDED SYSTEMS**

Introduction to Embedded Systems --Structural units in Embedded processor, selection of processor & memory devices- DMA, Memory management methods- memory mapping, cache replacement concept. Timer and Counting devices, Watchdog Timer, Real Time Clock

**UNIT II EMBEDDED NETWORKING AND INTERRUPTS SERVICE MECHANISM**

Embedded Networking: Introduction, I/O Device Ports & Buses-- Serial Bus communication protocols - RS232 standard – RS485 –USB – Inter Integrated Circuits (I2C) – interrupt sources , Programmed-I/O busy-wait approach without interrupt service mechanism- ISR concept-- multiple interrupts – context and periods for context switching, interrupt latency and deadline - Introduction to Basic Concept Device Drivers.

**UNIT III RTOS BASED EMBEDDED SYSTEM DESIGN**

Introduction to basic concepts of RTOS- Task, process & threads, interrupt routines in RTOS, Multiprocessing and Multitasking, Preemptive and non-preemptive scheduling, Task communication- shared memory, message passing-. Interprocess Communication – synchronization between processes-semaphores, Mailbox, pipes, priority inversion, priority inheritance-comparison of commercial RTOS features - RTOS Lite, Full RTOS, VxWorks, µC/OS-II, RT Linux.

**UNIT IV EMBEDDED PROGRAMMING**

C and Assembly - Programming Style - Declarations and Expressions - Arrays, Qualifiers and Reading Numbers - Decision and Control Statements - Programming Process - More Control

*Dr. Anurag*

*K. S. Patil*

6

Statements - Variable Scope and Functions - C Preprocessor - Advanced Types - Simple Pointers  
- Debugging and Optimization – In-line Assembly.

### UNIT V. C PROGRAMMING TOOL CHAIN IN LINUX

C preprocessor - Stages of Compilation - Introduction to GCC - Debugging with GDB - The Make utility - GNU Configure and Build System - GNU Binary utilities - Profiling - using gprof  
- Memory Leak Detection with valgrind - Introduction to GNU C Library

**EMBEDDED C** Adding Structure to 'C' Code: Object oriented programming with C, Header files for Project and Port, Examples. Meeting Real-time constraints: Creating hardware delays - Need for timeout mechanism - Creating loop timeouts - Creating hardware timeout.

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
MCA (6 years) IX SEMESTER  
IC- 903 Network & Information Security

7

**Course Objectives**

To gain understanding of principles and practices of computer system security including operating system security, network security, software security and web security.

**Prerequisites:**

Data Structures & Algorithms. Computer Networks

**Course Contents**

**Unit I Information security and Cryptography:**

Block and stream ciphers, Cryptographic hash functions, Message Authentication Codes (MAC), Public and private key systems, Message digests. Approximate strength of ciphers, Authentication. Password system. Secure design principles (Least-privilege, fail-safe defaults, complete mediation, separation of privilege), TCB and security kernel construction, System defense against memory exploits, UNIX security and Security-Enhanced Linux (SELinux), Windows security.

**Unit II Data Security Integrity, Vulnerability Exploitation:**

Vulnerability auditing, penetration testing, Sandboxing, Control flow integrity

**Unit III Network and Web Security:** TCP/IP security issues. DNS security issues and defenses. TLS/SSL, Network Intrusion detection and prevention systems, Firewalls, User authentication, authentication-via-secret and session management, Cross Site Scripting, Cross Site Request Forgery, SQL Injection .

**Unit IV Resource Protection models, Side channel attacks, Authentication models:** Authentication methods, various side channels and methods of encoding information, the tradeoffs of side-channel protection and system usability.

**Unit V Trusted Computing, Legal and Ethical Issues:** Cybercrime and computer crime. Intellectual property, copyright, patent, trade secret, Hacking and intrusion, Privacy, identity theft.

*also include Antivirus topics as discussed. Unit V may be revisited. Validated*

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
M.tech (5 1/2 Years) VIII SEMESTER  
IT-811: Information Security

Course Objectives

Objectives of this course is to gain understanding of principles and practices of computer system security including operating system security, network security, software security and web security.

UNIT-1

Internet Ethics, Browser Security, Downloads, e-Mail Security and guidelines for using e-mail safely, Malware, Mobile Security, Online Banking Risks, Online Scams, Password Threats

UNIT-2

Social Engineering, Desktop Security, Copyrights, Instant messengers, security risks, Data Security, Importance of securing data, Different methods of securing data, Identity theft, Online predators, Phishing and vishing scams, SPAM

UNIT-3:

Introduction to Cryptography: History of cryptography, Basic principles and theorem, Block and stream ciphers, Cryptographic Algorithms :DES, 3DES, RC-4, Twofish, Blowfish and AES, RSA, hash functions, Public and private key systems.

UNIT -4:

Approximate strength of cyphers, Authentication, Password system, Secure design principles (Least privilege, fail-safe defaults, complete mediation, separation of privilege), TCB and security kernel construction, System defence against memory exploits Windows security.

UNIT-5

Data Security and Network security, Network Intrusion detection and prevention systems, Firewalls, User authentication, authentication-via- secret and session management, SQL Injection, Resource Protection models, Side channel attacks, Authentication models, Authentication methods, Trusted Computing, Legal and Ethical Issues

References :

Second Edition, Wiley, Wiley Success 7000 for Data Analysts and Hierarchical

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE

M. Tech. (5 1/2 Years) VIII Semester

IT-813: Ethics in Computing

COURSE OBJECTIVES

- To understand the concepts of computer ethics in work environment.
- To understand the threats in computing environment
- To understand the intricacies of accessibility issues
- To ensure safe exits when designing the software projects

*[Handwritten signature]*

UNIT I COMPUTER ETHICS INTRODCUTION AND COMPUTER HACKING

A general Introduction – Computer ethics: an overview – Identifying an ethical issue – Ethics and law – Ethical theories - Professional Code of conduct – An ethical dilemma -- A framework for ethical decision making - Computer hacking – Introduction -- definition of hacking – Destructive programs – hacker ethics - Professional constraints – BCS code of conduct – To hack or not to hack? – Ethical positions on hacking.

UNIT II ASPECTS OF COMPUTER CRIME AND INTELLECTUAL PROPERTY RIGHTS

Aspects of computer crime - Introduction - What is computer crime - computer security measures – Professional duties and obligations - Intellectual Property Rights – The nature of Intellectual property – Intellectual Property – Patents, Trademarks, Trade Secrets. Software Issues, Copyright - The extent and nature of software piracy -- Ethical and professional issues – free software and open source code

UNIT III REGULATING INTERNET CONTENT, TECHNOLOGY AND SAFETY

Introduction – In defence of freedom expression – censorship -- laws upholding free speech – Free speech and the Internet - Ethical and professional issues - Internet technologies and privacy – Safety and risk – assessment of safety and risk – risk benefit analysis -- reducing risk.

UNIT IV COMPUTER TECHNOLOGIES ACCESSIBILITY ISSUES

Introduction -- Principle of equal access – Obstacles to access for individuals -- professional responsibility - Empowering computers in the workplace – Introduction – computers and employment – computers and the quality of work – computerized monitoring in the work place – telecommuting - social, legal and professional issues - Use of Software. Computers and Internet-based Tools - Liability for Software errors - Documentation Authentication and Control – Software engineering code of ethics and practices - IEEE-CS - ACM Joint task force

UNIT V SOFTWARE DEVELOPMENT AND SOCIAL NETWORKING

Software Development – strategies for engineering quality standards – Quality management standards – Social Networking – Company owned social network web site – the use of social networks in the hiring process – Social Networking ethical issues -- Cyber bullying -- cyber stalking – Online virtual world – Crime in virtual world - digital rights management - Online defamation – Piracy – Fraud.

MCA - VIII Sem  
HUMAN COMPUTER INTERACTION

**UNIT - I Introduction- Importance of user Interface** – definition, importance of good design. Benefits of good design. A brief history of Screen design.

**UNIT - II The graphical user interface** – popularity of graphics, the concept of direct manipulation, graphical system, Characteristics, Web user – Interface popularity, characteristics- Principles of user interface.

**UNIT - III Design process** – Human interaction with computers, importance of human characteristics human consideration, Human interaction speeds, understanding business junctions.

**UNIT - IV Screen Designing** : Design goals – Screen planning and purpose. organizing screen elements. ordering of screen data and content – screen navigation and flow – Visually pleasing composition – amount of information – focus and emphasis - presentation information simply and meaningfully – information retrieval on web – statistical graphics – Technological consideration in interface design.

**UNIT - V Windows** – New and Navigation schemes selection of window, selection of devices based and screen based controls. Components – text and messages, icons and increases – Multimedia, colors, uses problems, choosing colors.

**UNIT - VII**

**Software tools** -- Specification methods, interface – Building Tools.

**Interaction Devices** – Keyboard and function keys – pointing devices -- speech recognition digitization and generation -- image and video displays -- drivers. Case Study 1- Multi-Key press Hindi Text Input Method on a Mobile Phone. Case Study 2 - GUI design for a mobile phone based Matrimonial application. Case Study 3 - Employment Information System for unorganised construction workers on a Mobile Phone.

IT-1009B: Information Technology Project Management

**Aim of Course:** To make the students familiar with design of a good quality project to industries and academia.

**Objectives:**

The course is designed to make students:

- To present basic concepts of ITPM
- Understand the concepts of project management, project integration, project quality management etc.

**UNIT I**

Project, Project Management, Role of the Project Manager, Project Management and Information Technology Context. A system view of Project Management. Understanding the Organization, Stakeholder Management, Project Phases and the Project Life Cycle, Context of Information Technology Projects, Project Management Process Groups, Mapping Process Groups to Knowledge Areas.

**UNIT II**

Project Integration Management, Strategic Planning and Project Selection, Preliminary Scope statements, Project Scope Management, Scope Planning and Scope Management Plan, Scope Definition and the Project Scope Statement.

**UNIT III**

Project Time Management, Activity Definition and Sequencing, Activity Resource and Duration Estimating, Schedule Development and Control, Project Cost Management, Cost Estimating, Cost Budgeting, Cost Control.

**UNIT IV**

Project Quality Management, Quality Planning, Quality Assurance, Quality Control, Project Human Resource Management, Keys to Managing People, Human Resource Planning, Acquiring the Project Team, Developing the Project Team, Managing the Project Team.

**UNIT V**

Project Communication Management, Communication Planning, Information Distribution, Performance Reporting, Managing Stakeholders, Project Risk Management, Risk Management Planning, Risk Response Planning, Risk Monitoring and Control, Project Procurement Management, Planning Purchasing and Acquisitions, Planning Contracting, Requesting Seller Responses, Selecting Sellers, Administering the Contract, Closing the Contract

**Text Book:**

International Institute of Professional Studies, DAVV, Indore  
Design Pattern  
M.Tech (5 yrs/ 5<sup>1/2</sup> yrs) X Semester

**Learning Objectives:** To strengthen the knowledge of Object Oriented Design and development by understanding various design patterns for object oriented reusable Software.

**Pre requisites:** Knowledge of object oriented system concepts, object oriented analysis and Modeling and object oriented programming using Java.

**COURSE CONTENTS**

**I Review of Object Orientation**

Introduction to Software Patterns, Overview of UML, Class Diagrams, Collaboration Diagrams, State chart Diagram, Deployment Diagram,

**II Introduction**

Introduction to design pattern, describing design pattern, design Pattern for solving problem, selection of design pattern, use of design pattern. Fundamental Design Patterns: Delegation, Interface, Abstract Super-class, Interface and Abstract class, Marker Interface.

**II Creational Pattern**

Simple Factory pattern, Factory Method, Abstract Factory, Builder, Prototype, Singleton

**III Structural Pattern**

Adaptor, Bridge, Composite, Façade, Flyweight, Decorator, Proxy Pattern

**IV Behavioral Pattern I**

Chain of Responsibility, Command, Interpreter, Mediator, Memento Pattern

**V Behavioral Pattern II**

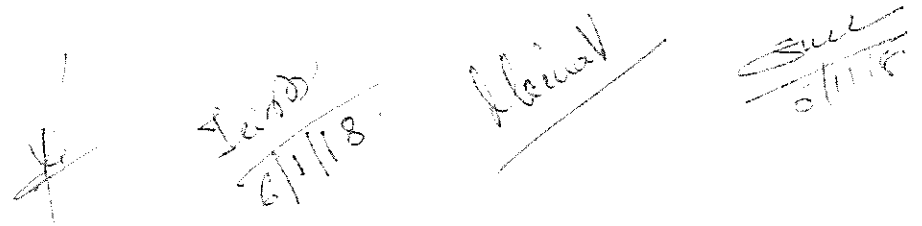

Observer, State, Strategy, Template Method, Visitor, Iterator Pattern

**Text Book**

1. Gamma, Helm, Johnson, Vlissides, Design Patterns. Elements of Reusable Software.. Pearson Education 2006

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
M. Tech. (IT) 5 1/2 Years IX SEMESTER  
IT-918: Cloud Computing

**Aim of Course:** To enable the students to have a thorough understanding of the activities associated to Cloud computing, its architecture, virtualization technology etc.

**Course Contents:**

**Unit-I**

**Introduction:** Historical development ,Vision of Cloud Computing, Characteristics of cloud computing as per NIST , Cloud computing reference model ,Cloud computing environments. Cloud services requirements, Cloud and dynamic infrastructure, Cloud Adoption and rudiments .Overview of cloud applications: ECG Analysis in the cloud, Protein structure prediction, Gene Expression Data Analysis ,Satellite Image Processing ,CRM and ERP ,Social networking .

**Unit-II**

**Cloud Computing Architecture:** Cloud Reference Model, Types of Clouds, Cloud Interoperability & Standards, Scalability and Fault Tolerance, Cloud Solutions: Cloud Ecosystem, Cloud Business Process Management, Cloud Service Management. Cloud Offerings: Cloud Analytics, Testing Under Control, Virtual Desktop Infrastructure.

**Unit -III**

**Cloud Management & Virtualization Technology:** Resiliency, Provisioning, Asset management, Concepts of Map reduce , Cloud Governance, High Availability and Disaster Recovery. Virtualization: Fundamental concepts of compute ,storage, networking, desktop and application virtualization .Virtualization benefits, server virtualization, Block and file level storage virtualization Hypervisor management software, Infrastructure Requirements . Virtual LAN(VLAN) and Virtual SAN(VSAN) and their benefits .

**Unit-IV**

**Cloud Security:** Cloud Information security fundamentals, Cloud security services, Design principles, Secure Cloud Software Requirements, Policy Implementation, Cloud Computing Security Challenges, Virtualization security Management, Cloud Computing Security Architecture .

**Unit-V**

Market Based Management of Clouds , Federated Clouds/Inter Cloud: Characterization & Definition , Cloud Federation Stack . Third Party Cloud Services . Case study : Google App Engine

INTERNATIONAL INSTITUTE OF PROFESSIONAL STUDIES, DAVV, INDORE  
MCA (6 Years) X SEMESTER

IC-1003- Elective: Software Testing & Quality Assurance

**Objective**

To understand the impact of Software Bugs and the importance of Software Testing.  
To develop the skills to effectively plan the tests, communicate the bugs and measure your success as a software tester.

**Pre –Requisites**

System Analysis & Design, Software Engineering

**Unit I**

**Introduction to Software Testing**

Overview of Software development Process, Testing Definition & Objectives, Verification Vs Validation, Types of software bugs, cost of Bugs, Responsibilities and Qualities of Software Tester, Testing lifecycle, Testing axioms, Software Testing terms& Definitions.

**Unit II**

**Software Testing Fundamentals and Process :**

Examining the specification: Black Box Vs White Box Testing. Static black box testing: high /low level review of specifications and test techniques. Dynamic black box techniques: data testing, state testing, other black box test techniques. Static White box techniques: Examining the design and code, Formal reviews, Coding standards and guidelines, Generic Code Review Checklist. Dynamic White box techniques: Testing the pieces: Unit & Integration testing, Data coverage code coverage.

**Unit III:**

**Types Of Testing:**

Unit Testing, Integration Testing, System Testing: Performance, Load, Stress, Security, and Recoverability. Regression testing, Installation testing, Usability, Acceptance testing: Alpha & Beta testing, Configuration Testing , Compatibility Testing ,Web Site Testing ,Documentation testing, Foreign language Testing ,etc.

**Unit IV:**

**Working with Test Documentation :**

Planning your Test efforts: Test Phases, Test Strategy, Test schedule, Metrics and statistics, Risk and issues. Writing and Tracking Test cases: Test Design, Test Procedures, Bug Tracking systems and Reporting.

**Unit V**

**Software Quality Assurance Fundamentals :** Definition of Quality, Quality Assurance , QC, SQA. Software Quality Metrics, SQA Activities , Process Improvement- Process and Product Quality  
**Automated Testing and Test Tools**

Benefits of Automation and tools, Test tools ,Software test Automation

**Case Study: Testing the Software using manual and Automated Testing Tools.**

**Text Books :**

1. Software Testing By Ron Patton, TechMedia Pub.

06/01/2018

Manual  
06/07/2013

**Aim of Course:** To make students know about the basic concepts of Natural Language Processing.

**Objectives:**

The course is designed to make students:

- Understand basic concepts of natural language processing.
- Understand NLP problems and survey the literature about that problem
- Design an innovative application using NLP components.
- Implement a rule based system to tackle morphology/syntax of a Language.

**Prerequisites:**

Formal Language Theory, Artificial Intelligence, Data Structures and Algorithms

**Course Contents**

**Unit I Introduction:**

NLP tasks in syntax, semantics, and pragmatics. Applications such as information extraction, question answering, and machine translation. The problem of ambiguity. The role of machine learning. Brief history of the field.

**Unit II N-gram Language Models:**

The role of language models. Simple N-gram models. Estimating parameters and smoothing. Evaluating language models.

**Part of Speech Tagging and Sequence Labeling:** Lexical syntax. Hidden Markov Models (Forward and Viterbi algorithms and EM training).

**Unit III Syntactic parsing:**

Grammar formalisms and treebanks. Efficient parsing for context-free grammars (CFGs). Statistical parsing and probabilistic CFGs (PCFGs). Lexicalized PCFGs. Neural shift-reduce dependency parsing.

**Semantic Analysis:** Lexical semantics and word-sense disambiguation. Compositional semantics. Semantic Role Labeling and Semantic Parsing.

**Unit IV Information Extraction (IE):**

Named entity recognition and relation extraction. IE using sequence labeling.

**Machine Translation (MT):** Basic issues in MT. Statistical translation, word alignment, phrase-based translation, and synchronous grammars.

**Unit V Words, Word Forms and Meaning:**

Morphology fundamentals, Morphological Diversity of Indian Languages, Wordnet Theory, Indian Language Wordnets and Multilingual Dictionaries.

**Text Book**

1. Jurafsky, Dan and Martin, James, Speech and Language Processing, Second Edition, Prentice Hall, 2008.
2. P. J. Antony, K. P. Soman Natural Language Processing For Indian Languages: A Literature Survey, LAP LAMBERT Academic Publishing, 2012  
by (Author)

**International Institute of Professional Studies,  
Devi Ahilya University, Indore.**

**Master of Computer Applications(MCA 6 Yers)**

**Multimedia Computing (IC-1005)**

**Objective:** To give exposure to the students on latest development in the field of Multimedia and related fields.

**Prerequisite:** Computer Graphics and fundamentals of Information Theory.

**Course of Contents**

**Unit-I Multimedia: Introduction and Applications**

Introduction to Multimedia, Motivation and Applications, Signals and Waves, Analog and Digital Data, Components of multimedia , Sampling and Quantization; Fundamentals of Information theory, Multimedia Authoring tools. Basics of Data Compression: - Run-length, Huffman, Arithmetic.

**Unit-II Fundamentals of Image**

Image Data Representation, Colour Models: RGB, YCbCr; Main Image File Formats: Bitmap Files; Halftoning, Dithering; Lossless Image Compression: Run-length Coding (pcx), Lossy Image Compression, Cosine Transform Based Coding (jpeg).

**Unit-III Basics of Digital Audio**

Introduction to Digital Audio, Representing Audio Data, WAV Audio Format, Audio Data Compression, MP3, MIDI concepts, Audio memory representation.

**Unit-IV Basics of Video**

Video: Digitization of video, Video capturing , Video transmission standards; EDTV, CCER, CIF, SIF, HDTV, Video formats: H-261, H-263. MPEG Video compression. Video streaming. Study and analysis of video formats, compression and streaming. *JPEL*

**Unit-V Multimedia Network Communication**

Multimedia Communication and applications, Study of Multimedia networking, Quality of data transmission, Multimedia over IP, Media on Demand.

Applications: Media Entertainment, Media consumption, web-based applications, e-learning and education, Different Multimedia applications, Analysis and development of Multimedia application

**Books Recommended:**

Master of Technology(IT)(5<sup>1/2</sup> Yers)

Image Processing (IT-805)

**UNIT I DIGITAL IMAGE FUNDAMENTALS**

Introduction – Origin – Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization – Relationships between pixels - color models

**UNIT II IMAGE ENHANCEMENT**

Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering–Smoothing and Sharpening Spatial Filtering – Frequency Domain: Introduction to Fourier Transform – Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters

**UNIT III IMAGE RESTORATION AND SEGMENTATION**

Noise models – Mean Filters – Order Statistics – Adaptive filters – Band reject Filters – Band pass Filters – Notch Filters – Optimum Notch Filtering – Inverse Filtering – Wiener filtering  
Segmentation: Detection of Discontinuities–Edge Linking and Boundary detection – Region based segmentation- Morphological processing- erosion and dilation

**UNIT IV WAVELETS AND IMAGE COMPRESSION**

Wavelets – Subband coding - Multiresolution expansions - Compression: Fundamentals – Image Compression models – Error Free Compression – Variable Length Coding – Bit-Plane Coding – Lossless Predictive Coding – Lossy Compression – Lossy Predictive Coding – Compression Standards

**UNIT V IMAGE REPRESENTATION AND RECOGNITION**

Boundary representation – Chain Code – Polygonal approximation, signature, boundary segments – Boundary description – Shape number – Fourier Descriptor, moments- Regional Descriptors –Topological feature, Texture - Patterns and Pattern classes - Recognition based on matching.

## IIPS, DAVV

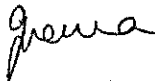

### Proposal for Departmental Committee

Sub:- Approval of new specialization schemes for MBA(MS) 5yrs PG and MBA(MS) 2yrs

A workshop was conducted at IIPS in June 2015 to review the course structure, curriculum and course content of various programs. Opinion was gathered from industry experts, subject experts, faculty, alumni and students. The outcome of this workshop is to offer the new scheme of specialization from July 2015.

- The scheme of Dual specialization and Single specialization is proposed to be offered to students in Marketing, Finance and HR
- The credits in each semester are proposed to be in accordance with new Ordinance 31.
- This being the introductory year for this new scheme, it is possible that less number of students opt for any particular option. Therefore, it is proposed that the present scheme will be offered even if there are minimum 5 students in a group.
- The proposed scheme has been approved by the expert panel.
- The proposed scheme has also been approved by Program Incharges of all programs of IIPS.
- The Schemes approved by Expert Panel and Minutes of PI Meeting are enclosed

Submitted for approval.

Program Incharge
